Work History

Trainee Engineer - Remiges Technologies Pvt. Ltd. - Navi Mumbai, India

Feb 2024 to Present

Working at Client Location National Stock Exchange at BKC Mumbai - 400070

Project Name: Multicast Tick by Tick (NSEIX)

- The Project Involves handling real-time market data, which was multicast via UDP to a Member Server.
- Implemented a mechanism to recover dropped tick data from the Post Trade Market.

Protocols and Technologies: UDP (User Datagram Protocol) | TCP/IP | Shared memory | C | Bash Scripting

Skills

- C | C++ | DSA | Assembly(8085) | Embedded C (Bare metal and Hardware Abstraction Layer) | Embedded SQL
- Intel 8051 | ARM7-LPC2148 | Cortex-M3 LPC1768 | RISC-V (CH32V003F4U6) | PIC16F886 | AVR Atmega16
- UART | MODBUS | SPI | I2C | ADC | WIFI | Bluetooth | CAN | UDS
- RTOS (STM32F446RE) | FreeRTOS
- IDE : GCC | SDCC | uVision4/5 | Embeetle IDE | Atmel Studio IDE | Moun River IDE (Eclipse) | Proteus Simulation
- Linux Internals : System Call | Signals | IPC(Pipe, Fifo, Message Queue, Shared memory, Semaphore) | Multi Threading
- Bash Shell Scripting
- TCP/IP | UDP

Other Projects

1. Mini Project – Customer Product Billing System (C Language | DSA)
2. Mini Project – Library Management System (C language | DSA)
3. Mini Project – Dignostics 8051/LPC2148/LPC1768 Microcontroller Board (LED | KEYPAD | LCD | SWITCH | UART)

Education

Vector India Hyderabad, India | Post Graduate Diploma Advanced Embedded System Course

October 2023

DETAILS VECTOR PROJECT

Title : MULTIPURPOSE E-CARD SYSTEM Based on ARM7 LPC2148 Micro-Controller

https://github.com/rbansod5/Embedded-Projects/tree/389282d73c813439a0d8b543cf77e2b7cf3eb78a/RFID_CARD

Description :

- To Use Single Card for Multiple Applications.
- It should access for voting and store data in EEPROM by using I2C protocol.
- It access ATM to withdraw cash multiple of 100 and update remaining balance in EEPROM.
- It should access pan card details.
- Whenever system is reset but data store in the EEPROM

Priyadarshini College Of Engineering Nagpur, India | Electrical Engineering (Electronics and Power) November 2020

Rashtrasant Tukdoji Maharaj Nagpur University, Nagpur.

CGPA : 8.13 / Percentage : 73.80%

DETAILS ACADEMIC PROJECT:

Title: REMOTE MONITORING OF EARTHING SYSTEM

(<https://ijarcce.com/wp-content/uploads/2020/05/IJARCCE.2020.9421.pdf>)

Description :

- It is a device which use to monitor resistance of soil
- System measure moisture of the soil
- System should display the value of leakage current, resistivity of soil, moisture level.
- If resistance of soil above permissible limit system gives alarm and turn ON water supply.
- System stored all the real time data in computer.
- PIC 16F886 microcontroller is used.

Samarth Jr. College Lakhani | Maharashtra, India | HSC (12th Std.) PCMB

February 2014

Samarth Vidyalaya Lakhani | Maharashtra, India | SSC(10th Std.) Science

March 2012

Personal Information

Gender : Male

Nationality : Indian

Languages Known : English, Hindi, and Marathi

Permanent Address : Murmadi/Sawri Ward No.4 Behind Gov. Hospital Lakhani Dist:- Bhandara 441804
